

Software Engineer UI Design Test

Algorizin

Procedure

1. Create a repository in GitHub and initiate a project using either *create-react-app* or *NextJs*.
2. Then create the page given below using Tailwind CSS.
3. Make the GitHub project public and share the link via email.
4. Deploy the site using netlify/vercel (or any other platform) and include the link in the email. (optional)
5. Submission deadline: **7 May 2022**

Requirements

1. UI implementation needs to be pixel perfect.
2. The UI should be responsive. 3 design is provided for desktop, tablet and mobile view.
3. The UI doesn't have to be functional.

Evaluation criteria

You will be evaluated on the following points.

1. UI implementation matching with the design provided.
2. Responsiveness of the implementation.
3. Code structure.
4. Usage of CSS classes and Tailwind configuration.
5. Following best practices.

You can find the design here: [UI design figma file link](#)

N.B: Algorizin will only use your codes for evaluation purposes. You will hold the full rights to your code and Algorizin will not use any of the codes for any other purposes.
